DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-17 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In claims 1, 7, and 9, applicant has claimed "glass ecospheres." It is not clear to what the meaning is of "ecospheres."

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 9, and 17 are rejected under 35 U.S.C. 103(a) as being unpatentable over Barney et al. (6,627,697 B2) in view of Strauss (4,031,059). Barney et al. disclose a material, for the same use as that of applicant, comprising a silicone resin, silicone catalyst, glass spheres, and a silicone solvent (col.3, line 47-col.4, line 20 and col.4, lines 45-59). Barney et al. do not appear to specifically disclose ground cork. Strauss discloses a composition comprising silicone resin, a catalyst, glass spheres, and ground cork (col.17,

lines 14-54). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have added ground cork as taught by Strauss to the composition of Barney et al. because Strauss teaches that adding ground cork to a silicone resin composition with glass spheres produces a low density composition which, upon heating, decomposes to a dimensionally stable char, resulting in a higher quality product.

Allowable Subject Matter

Claims 7 and 8 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action. Barney et al. disclose amounts of silicone resin, silicone catalyst, glass spheres, and silicone solvent, but in clearly different amounts than that as claimed by applicant. It would not be obvious to alter the amounts of Barney et al. due to the difference in ranges.

Claims 2-6, and 10-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims. Barney et al. disclose amounts of silicone resin, silicone catalyst, glass spheres, and silicone solvent, but in clearly different amounts than that as claimed by applicant. It would not be obvious to alter the amounts of Barney et al. due to the difference in ranges. Strauss does not appear to teach or disclose a silicone solvent, or a solvent in general.
